

LED Rotary Dimmer 100W

ROTARY DIMMER 100W FOR LED

Lighting control

Description of product family

A lighting control for dimmable LED lamps and luminaires, L and LC transformers, 230 V halogen lamps and incandescent lamps up to 100 VA. Minimum load 1 VA. The light is switched on and off by pushing the button, the dimmer function is operated by twisting the switch. Can be adjusted at intervals or steplessly. No need for a neutral conductor. The package includes two different frames and press buttons that are compatible with ABB's Jussi and Impressive devices and Schneider's Exxact, Elko RD16 and Gira devices (ABB and Gira frames are not included in the package). Comes with an adapter (4 mm -> 6 mm). Automatic short-circuit, overheating and overload protection. Over-voltage protection up to 2 kV. Suitable only for dry indoor spaces.

Technical details

Classic white paper star, Ø 50 cm. Five-pointed design. Star decorations. Does not include a light source or adaptor. Illuminate the star with Paper Star String Light (No. 9477937) or hanging light cord and LED bulb (No. 9477098 and 9410807). For indoor use only.
