

LED tubes

LED T8 590 840 G13 900lm

Description of product family

Airam LED tubes are long-lasting and energy efficient. LED tubes provide improved light quality and high luminous efficiency, especially in cold conditions. The tubes can be directly replaced with fluorescent tubes using the supplied LED starter. LED tubes are also suitable for luminaires designed specifically for them. Short LED tubes (59 cm and 43.8 cm) are not suitable for connecting two lamps via a single ballast. If the luminaire includes a compensation capacitor, removing it improves the power factor (PF).

Technical details

A 3-outlet extension cord with an on/off switch and black and white fabric cable for indoor use. Black plug and housing. Enclosure rating IP20 Cable length 2 meters. H05VV-F 3 x 1.5 mm².
