

T5

1900lm 24000h

Tubes

The T5 G5 range of fluorescent tubes covers the basic power ratings and all lengths. These fluorescent tubes emit pleasant, stable light. They produce a lot of light and consume little energy. The products are packed in narrow cartons where the important product information is clearly displayed. Packaging also protects the tube in the shop and during transport. The tone is pure white (3000 K).
