

2270lm 2000h

Halogen linear multi-packs

Linear halogens have traditionally been used as light sources in various floodlights. They are powerful lamps that are very resistant to heat. This makes them ideal for applications where effective light is needed for long periods, such as for renovation projects. The products are packed in durable blister packs which both protect the product and present it clearly.

Clear linear halogen J118 120W 2900K R7s 2270lm 2000h 9 x 118 mm, 2 pcs in blister packing.
