

LED T8

9W 30000h PEG BX

Airam LED tubes are long-lasting and energy efficient. LED tubes provide improved light quality and high luminous efficiency, especially in cold conditions. The tubes can be directly replaced with fluorescent tubes using the supplied LED starter. LED tubes are also suitable for luminaires designed specifically for them. Short LED tubes (59 cm and 43.8 cm) are not suitable for connecting two lamps via a single ballast. If the luminaire includes a compensation capacitor, removing it improves the power factor (PF).

Opal T8 LED tube 9W 4000K G13 1350lm 30000h 28x604mm, cardboard packing. The conventional starter needs to be replaced with the LED starter included in the package. Supply frequency ~50/60Hz.
