

Herby

Herby Plant 10W/840 650lm

Grow light

Description of product family

Grow lighting helps plants grow taller and stronger. During the darker season, houseplants benefit from at least eight hours of supplemental light per day. Herby LED is designed for growing herbs, seedlings and small houseplants. You can select either cool white light (4000 K) or red grow light. Herby is intended for growing plants in their own pots – no soil or water should be placed directly in the base tray. Any excess watering water draining from the pots can easily be poured out and the tray cleaned. The luminaire accommodates three Ø 8–9 cm herb pots, while larger pots can be placed directly on the base. When sowing seeds, small pots can be placed in the perforated insert. Line the pot with newspaper to prevent soil from falling into the tray, or alternatively use peat pellets.

Technical details
