

Verso

PLANT LIGHT VERSO 14W/940 650LM

Grow light

### Description of product family

Verso is an ideal LED grow light for germination and small herbs. The parts are supplied separately in a compact package and are easy to assemble: attach the metal legs to both ends of the light bar and to the support feet so that the light stands securely on a surface. Place the plants underneath the light. The product features a built-in automatic timer: the light is on for 16 hours and off for 8 hours. The integrated cool white LED provides excellent colour rendering (CRI95). The LED light generates little heat and consumes only a small amount of energy.

### Technical details
